### ABOUT ME

I am a passionate web developer with a strong foundation in front-end and back-end technologies. I like to create responsive and user-friendly interfaces. I enjoy building dynamic, scalable web applications and continuously learning new technologies to enhance my skill set

---

### PROJECTS

**Annapurna** Node.js, Express.js, EJS, Bootstrap, JavaScript, MongoDB 2023 - 2024

- Displays a variety of mess options with detailed information like menu, pricing, and availability.
- Token generation system for seamless food order management.
- Separate token management for each mess listing without database storage.
- <https://annapurna-m0ev.onrender.com/listings>

**College Compass** Node.js, Express.js, EJS, Bootstrap, JavaScript, MongoDB 2023 - 2024

- Form for personalized college recommendations based on user inputs (percentile, caste, and city preferences) , Integrated gemini bot for help.
- College data retrieval and ranking based on cutoff scores.
- Integration with MongoDB for preloaded data (colleges and cutoffs).
- Priority-based branch selection interface using numbered checkboxes.
- Option for users to arrange preferences and submit for a sorted result display.
